Brooks University

In-House, On-Site, On-Line

INTEGRATED SOLUTIONS

Brooks Automation offers certified instructor led or on-line courses at our world class training center in Chelmsford, MA. Our training solutions are designed to help customers make the most of their time, money, and equipment.

Benefits:

- Brooks University World-class training center allows hands on and classroom coursework
- Certified On-site training
- Certified Brooks Instructors
- On-line training, self-paced and accessible any time, day or night

Safety and Operations

Every employee who operates your Brooks equipment should successfully complete a Brooks Safety and Operations training course. These introductory courses are available free at our training center. These courses are designed to deliver basic knowledge and hands-on experience. Learn the theory, then immediately apply it in Brooks' state-of-the-art training laboratory.

Brooks University: In House

Come to Brooks University and immerse yourself in our world class Training experience. Our professional staff has an extensive background in the Semiconductor and Training Industry and works with Brooks' products on a daily basis. The instructors apply cutting edge accelerative training techniques to enrich the overall learning experience. The training programs are scenario and problem driven and students are motivated to achieve results. All instructors are PBET (Performance Based Equipment Training) certified and passionate about providing the best training experience possible.

Brooks University: On-Site

Don't want to send your operators, technicians or engineering staff away for training? Let Brooks University bring the learning to you. Brooks' certified instructors are available to deliver standard training at your facility. On-site training includes classroom and hands-on sessions to maximize the learning experience.

Brooks University: On Line

Is your schedule too tight to commitment to in-house or on-site training? Utilize Brooks University on-line to receive training at your own pace and on your own schedule. Learn at work or at home, from any computer connected to the web. This option is available with Brooks' e-Volution On-Line Training. Brooks offers a variety of Safety and Operator courses through e-Volution.

Additional Services

Feel confident that your employees have read and understood all equipment safety procedures. Brooks can implement an On-line Safety Training program, test each individual's understanding of the procedures, and provide a report indicating who has completed the training and who has successfully passed the associated test. In addition, you will automatically be notified of updates to Brooks' safety procedures. Contact Brooks Automation to discuss Brooks' Safety and Compliance Tracking Service.

Brooks Automation is the best way to ensure your staff is properly trained and stays ahead of technology changes. No one is better equipped to train your operations, maintenance and engineering staff than Brooks Automation.

For more information, please contact Brooks Automation's training staff at +1-(978)-262-7766, visit our website at http://www.brooks.com/pages/479_training.cfm, or contact your local Brooks Automation sales representative.
