FIXLOAD™ V4, V5, V6 Power Supply Upgrade TZP 80 elite

INTEGRATED SOLUTIONS

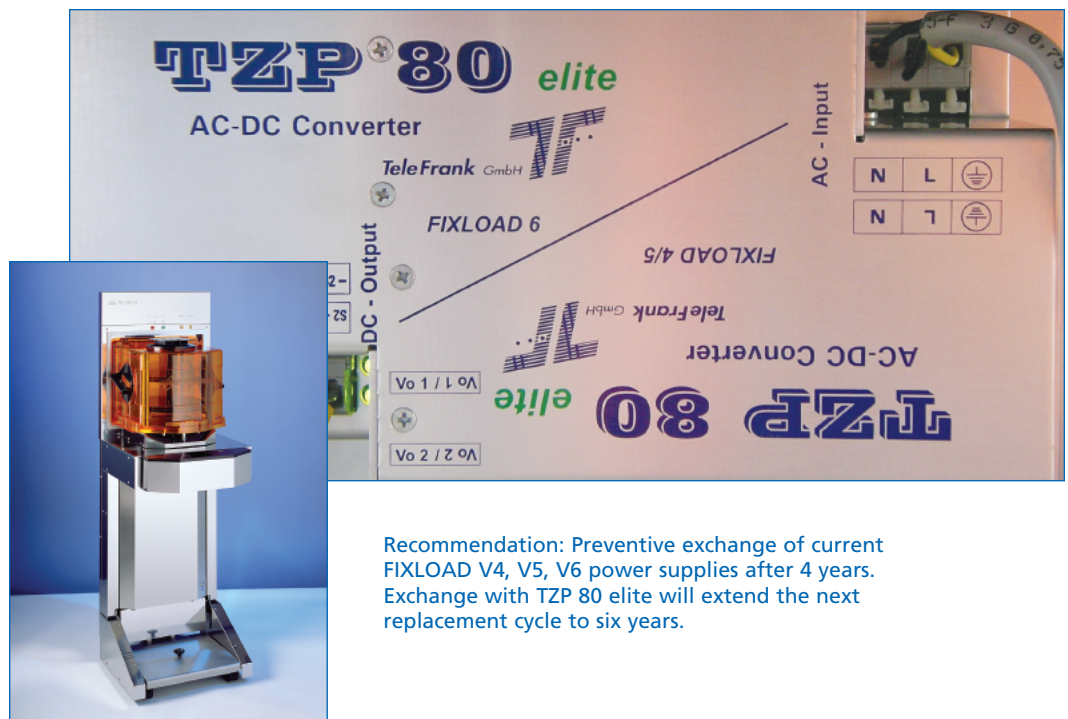

Brooks Automation has a portfolio of upgrade solutions to maximize product life and minimize Cost of Ownership. With the TZP 80 elite Brooks provides long life power supply technology for older FIXLOAD product lines.

Benefits:

- Eliminates unscheduled FIXLOAD downtime
- Improved reliability resulting in reduced scheduled service
- No Brooks service required for exchange
- Upgrade during scheduled downtime
- Universal design means minimal stocking requirements

At Brooks Automation Global Support, we are committed to supporting you. Our mission is to exceed expectations in all areas of customer responsiveness. All of our upgrades are backed by our 24x7x365 telephone line GUTS® – Guaranteed Up-Time Support. GUTS is our *around the clock, around the world*, rapid response system that delivers unsurpassed responsiveness worldwide to any Brooks product problem. Every call to our GUTS line is answered by capable, empowered Brooks employees with the knowledge and resources to diagnose customer problems quickly and accurately. With GUTS, customers are guaranteed an action plan within 59 minutes or less.

The TZP 80 elite power supply upgrade is a universal plug and play component replacement for existing TZP 80 power supplies in FIXLOAD V4, V5 and V6. This upgrade enables you to maximize the component life of these older FIXLOAD generations.

Recommendation: Preventive exchange of current FIXLOAD V4, V5, V6 power supplies after 4 years. Exchange with TZP 80 elite will extend the next replacement cycle to six years.

Features:

- Long life design: The TZP 80 elite is based on an improved electronic design for an expected lifetime of 6 years
- Plug and play exchange
- Fully compatible connectors to TZP 80
- Similar housing compared to TZP 80
- Just one universal kit to upgrade FIXLOAD V4, V5 or V6

Content:

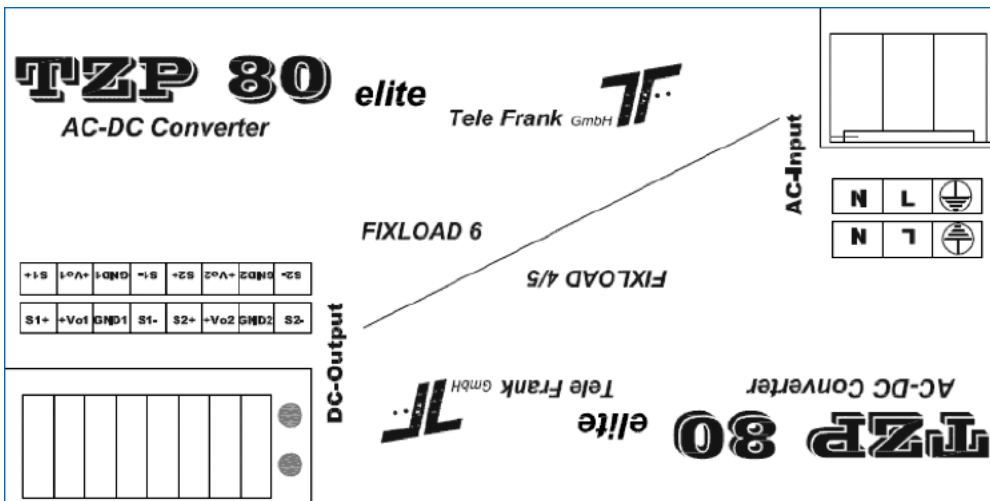

- TZP 80 elite
- Self sticking cable clips
- Installation manual

Conformity

- CE, RoHs, UL
